

WE NEED EVERY HAND ON DECK TO **SAVE BRISTOL BAY**

We can win the fight for Alaska's sustainable future, but it's going to take everyone pitching in. If foreign companies succeed, Pebble Mine would construct the world's largest toxic waste lagoon near Bristol Bay. Poisonous waste could end a way of life for thousands of fishermen. So, let's join hands. Together we can win this fight. www.RenewableResourcesCoalition.org

MINE**

WE NEED EVERY HAND ON DECK TO **SAVE BRISTOL BAY**

We can win the fight for Alaska's sustainable future, but it's going to take everyone pitching in. If foreign companies succeed, Pebble Mine would construct the world's largest toxic waste lagoon near Bristol Bay. Poisonous waste could end a way of life for thousands of fishermen. So, let's join hands. Together we can win this fight. www.RenewableResourcesCoalition.org

THEY NEVER STOP FIGHTING **NEITHER DO WE**

Nothing fights like a wild Bristol Bay salmon. That's why we owe it to them and the fisherman to fight for their survival. If Pebble Mine is built, poisons from the world's largest toxic waste lagoon could seriously damage the salmon run, destroying Alaska fishermen's sustainable way of life. Together we can win this fight. www.RenewableResourcesCoalition.org
