

# Pebble Mine

## Time for a **FISH FIGHT.**

Northern Dynasty keeps telling Alaskans to wait-and-see how they will develop Pebble Mine. But were you aware that Northern Dynasty has now applied for 11 permits at the headwaters of the world's largest salmon spawning streams that will:

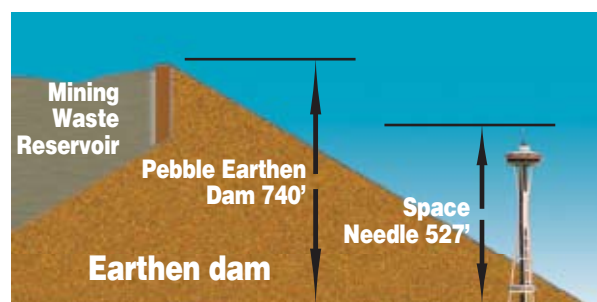

**Drain the Upper Talarik Creek**

**Drain the groundwater from around Upper Talarik Creek.**

**Build a 740 foot dirt dam holding back an enormous toxic waste dump on top of Frying Pan Lake and the Kaktuli River.**

### **The time to wait-and-see is over.**

Should we Alaskans risk clean water, commercial, sport and subsistence fisheries so a foreign company can take our gold and pay us just 7/10 of 1%? The oil industry pays us 23% for the same privilege. We would be risking 6300 permanent salmon jobs\* for 1000 temporary mine jobs.

**It's time for Alaskans  
to join this fish fight.**

**OPPOSE THE ~~PEBBLE~~ MINE**
