

# Food for Thought

*If the Pebble Mine is developed, it will destroy a large area that has been a calving home to the Mulchatna caribou herd.*

## **SO, WHAT WILL WE LOSE?**

You've hunted in the area the mine will destroy. Can you imagine what it will be like if Pebble Mine is actually developed? Can you picture the migration that will ensue? It's not just the caribou, it's the herd of giant trucks that will roam where caribou once did. What will happen to the hunting?

And what happens when the trucks leave – and the caribou are gone – and there is a big hole in the land? What will you tell your children?

*I'm ready for a food fight!*
